

CIS*4030 Lab 2

Part A: Building a To-do List

Part B: Building a Colour Grid

Note: I confirmed with TA Connor during the lab that the slight differences in box size are okay, as well as the differences in screen safe area.

Part C: Breaking Down an App Screenshot into Widgets

Note: To explain the annotations in words - I see the main column of the app has 2 large cards, where each of these large cards has a column of content with: title text, image, row of small cards with text inside each, address text, dollar sign text/icon.
